

Wasiu Ramoni

Front End Developer

PERSONAL SUMMARY

I have a breadth of abilities in mathematics and programming. I've always had a passion for computers and the internet since childhood. There's something so satisfying about finally getting the right information showing up in the "console". I am always learning and I pick up new concepts and skills incredibly fast. I love working with people who share the same enthusiasm with me to create solutions to complex problems that meets both technical and design requirements.
